Brewer Baseball Gears Up for District Competition

The Brewer baseball team had a solid showing at the Spring Break Classic this past weekend, going 2-2 in the tournament to bring the team's non-district record to 10-3 heading into district competition.

Coach Art Senato said his team competed well in the tournament and it provided him the opportunity to evaluate where his team stands as district gets set to get underway.

"We faced some really good competition and a lot of adversity," Senato said. "Those are two things that we really needed to see before we start district play this week. We pitched well at times, played great defense at times and hit very well at times. We only did all three in one of the three games. We need to be better."

Senato said he had some strong efforts in the tournament.

"Jesse Orozco was outstanding on the mound in our win over Lake Dallas," Senato said. "He threw a complete game and only threw 82 pitches. He had six strike outs and allowed six hits. At the plate, he 2 for 4 with a double and and 3-run homerun.

"Parker Evans threw seven shutout innings in our 1-0 extra innings win over Denton Ryan. He did not get the win, but without his performance, we would not have won that game. He only allowed two hits."

(continued on page 4)

From White Settlement ISD

Register for Free Mammogram Screenings April 5

Women over 40 without insurance and those who qualify can get a free mammogram on Saturday, April 5 from 8:30 a.m. to 4 p.m. The Moncrief Mobile Screening Clinic will be parked at the WSISD Administration Building, located at 8224 White Settlement Rd.

Call 1-800-405-7739 to schedule an appointment today.

Individuals with insurance can also schedule appointments. Please check with your insurance to make sure it is covered.

From the City of White Settlement

Spring Kid Fish March 22

The City of White Settlement's semi-annual Kid Fish event will be held at Veteran's Park, located at 8901 Clifford Dr. on Saturday, March 22 at 9 a.m.

Children under 16 are invited to come out and drop a line during the free event!

Parents or guardians can register their child online at www.wstx.us/recdesk.

First 30 kids that are checked in at the table on site will get a t-shirt, sizes are first come first serve.

A limited number of fishing poles will be available for those who do not own one, but it is on a first-come, first-serve basis, or guests can bring their own.

Participating children must be registered in order to record each catch and/or receive an award.

Parents may not fish for a child but can assist for the 1 to 3 year olds.

For more information, call 817-246-5012.

2025-2026 Academic Calendar Adopted

The WSISD Board of Trustees adopted the 2025-26 Academic Calendar on Feb. 24. The District Planning Committee solicited feedback regarding the proposed calendar from families and staff members. Concerns that were expressed often were:

- Change First Day of School - move first day of school to after Labor Day. If changed, the last day of school would be scheduled after Memorial Day, potentially extending into early June.

- Consider Four-Day Work Week. District officials annually consider the implementation of a four-day work week. However, the administration does not recommend implementing this change due to the hardship it could cause working families, especially considering that more than 60 percent of WSISD students are low-socioeconomic and rely on free and/or reduced breakfast and lunch at school.

- Adjust Staff Start Date - move first day for staff from Friday, Aug. 1 to Monday, Aug. 4. If staff begins on Aug. 4, a day would need to be added to the schedule. This would result in one less holiday or professional work day.

If staff members attend the summer trade days in June, they would not return until Aug. 4.

(continued from page 1)

In softball, Brewer defeated Chisholm Trail by a score of 9-0 on Friday.

Cozette Tyson went 2-3 with a double, triple and two RBI for the Bears, and Aleana Urias went 2-5 with a double and RBI in the game. Keira Miller went 2-3 with a double, triple and RBI for Brewer, and Maddie Folsom went 1-3 with a double and 3 RBI in the game for the Bears.

In the circle, Avery Welch, Tyson and Khloe Winn combined for a 5-hit shut out to pick up the win for the Bears.

On the pitch, the boy's soccer team wrapped up the regular season with an 8-0 victory over Azle last Thursday.

Coach Rafael Franco his team played especially well in the first half.

"Azle was a decent opponent," Franco said. "Our team came out a little shy on the first half but they played very dynamic offensively and they were able to put 6 goals in."

Franco said one player competed especially well against the Hornets.

"Joaquin Cedillo had a great performance," Franco said. "He kept Azle forwards from scoring in a couple of chances they had. He also scored twice in the second half."

With the post-season right around the corner, Franco said his team is playing well.

"We are excited to be in the playoffs again and we will be working hard to make the best out of our players," Franco said.

On the girl's side, the Lady Bears defeated Azle by a score of 2-1 to finish out the regular season.

Daniela Estrada and Audrey Valderas both scored in the victory for Brewer and Claire Simons had an assist in the game for the Lady Bears.

Atmos Energy Offers Options for Paying Natural Gas Bill

Over the past two months, many of the areas Atmos Energy serves experienced record-low temperatures. This winter weather may have increased the amount of gas used to operate your gas furnace, water heater, and other gas appliances, which may result in a higher gas bill.

Atmos Energy understands that budgets are tight, and we encourage customers to explore available resources that help you better understand and manage your winter gas bill.

What options does Atmos Energy offer to manage my natural gas bill?

- Sign up for the Budget Billing so your bill is more predictable each month.
- Enroll in an Installment Plan to spread the payment of your balance over time.
- Connect with local energy assistance agencies in your area to learn about financial assistance that is available to qualifying customers.

From your online Account Center, you can make payments, enroll in these free payment programs, and find a local energy assistance agency at your convenience. To learn more about these solutions, visit atmosenergy.com/assistance.

How can I better understand my bill?

To learn more about the terms and factors on your bill, visit atmosenergy.com/mybill. Additionally, you can use the Bill Comparison tool in your Account Center to compare your current bill with a previous bill. This will help you better understand how the weather, number of days in your billing cycle, and the amount of gas used impact your bill.

What factors impact my bill?

- The amount of natural gas used.
 - The natural gas commodity cost, which is a pass-through cost.
 - Customer and facility or delivery charges to your home or business.
 - Taxes/fees.
- Unusual or unexpected usage on your Atmos Energy bill could

mean that you have a gas leak. If you smell or suspect a natural gas leak, leave the area immediately. Then, from a safe distance, call 911 and Atmos Energy's 24/7 emergency line at 866-322-8667.

Atmos Energy is committed to the safe and reliable delivery of natural gas and continuing to provide exceptional customer service.

As always, our Customer Contact Center is available to answer any questions you may have Monday through Friday from 7 a.m. to 6 p.m. Central Time at 888-286-6700.

Schedule Your **FREE** Mammogram*

*for those who qualify

- Free cancer screening for women without insurance and those who qualify
- Mammograms for women ages 40 to 74
- Must be at least 1 year since last mammogram

Texas History Minute by Dr. Ken Bridges

Texas Metal: Lithium Discovery Sparks New Era of Innovation and Investment

The soil has long provided much for Texas, from farming to oil. As technology advances, Texas turns to the soil again. Many investors and business owners are excited about the possibilities of lithium. A large amount of the light metal promises deep in the Earth to start an important new era for many areas of East Texas.

Lithium was discovered by Swedish chemist J.A. Arfwedson in 1817. With only three protons in its atomic nucleus, it is one of the lightest elements in existence. Its unusual configuration of its three electrons allows it to bind to other elements easily, making it highly flammable. In fact, dropping pure lithium in a bucket of water would cause an explosion, but pure lithium is rarely found in nature. These same properties make lithium a good conductor for electricity and heat. Lithium is also used in nuclear research and as a component in some types of nuclear weapons.

It can also be used as an additive for certain types of fuel for rockets and missiles. The largest known sources of lithium are in Chile, Australia, Bolivia, Argentina, and China. It is sometimes found in ocean water and some plants and sea plankton. In recent years, an increasingly reliable source of lithium has been isolating it from within brines.

During World War II, lithium grease was used as a lubricant for some aircraft engines because of its ability to work at high temperatures. Lithium is also used to produce certain types of ceramics and glass, particularly some types of ovenwares.

Lithium is also the primary ingredient in a common antidepressant. Because of this, lithium was an ingredient in 7-Up until the 1940s. Several cities had natural sources in lithium in their water or had lithium added, a process called lithiation. Cities with lithiated water often reported lower rates of crime and suicide. However, cities reconsidered these policies and stopped the practice in the 1940s. Since the 1950s, mental health professionals have commonly prescribed it to treat depression, bipolar disorder, and

other conditions.

Today, lithium hydroxide and lithium peroxide are used in air purification systems in outer space and in submarines. Lithium peroxide is also used for emergency oxygen candles for these as well. Because lithium burns with a red color, it is sometimes used to make red fireworks.

Its use in batteries has made lithium the subject of renewed focus. As the electric car grows in popularity, lithium demand grows with it. Its unique electron configuration makes it ideal for use in electricity and led to the creation of the lithium-ion battery. These batteries can produce more power than the traditional lead or zinc batteries and had a longer lifespan. And it makes far easier to recharge, something that was difficult for other kinds of batteries.

NASA developed the first lithium battery in 1965, but the forerunner of the modern lithium-ion battery emerged in 1974. By the 1990s, it had been perfected. It began to be used in products as simple as children's toys to cell phones and then electric cars. One Texas scientist, Dr. John B. Goodenough of the University of Texas, helped make the new battery come to life. The discovery and many uses of the lithium-ion battery led the 2019 Nobel Prize in Chemistry to be awarded to Goodenough, French scientist Rachad Yazami, and Japanese chemist Akira Yoshino.

Geologists discovered a major lithium vein curving from western Mississippi into Arkansas and across East Texas. These finds combined could yield untold riches and important business investments for the region over time. While deposits in North Carolina, Nevada, and Wyoming have gained attention, the fields across East Texas could be a billion-dollar find by itself, with the lithium available potentially as valuable as the oil fields of the region of a century before.

The soft metal had been laying quietly under the Earth for millions of years, part of the geologic landscape of the region. For its many uses, it could potentially power the future.

Take These Six Steps to Manage Your Blood Pressure

High blood pressure, also known as hypertension, affects nearly half of adults in the United States, and only about 1 in 4 with this condition have it under control, according to the Centers for Disease Control and Prevention (CDC). Unmanaged hypertension can be dangerous and in many cases, fatal. Medical experts say that controlling your blood pressure is possible and it starts with having the right information.

“Nearly half of all American adults have high blood pressure, and many don’t even know it. High blood pressure is a ‘silent killer,’ often having no overt symptoms, but increases the likelihood of heart attack, stroke and other serious health risks. I urge you to know your numbers and make the simple lifestyle changes that can help you control your blood pressure and live a long and healthy life,” says Jack Resneck Jr., M.D., president of the American Medical Association (AMA).

To get on the right track, consider these tips and insights from the AMA:

1. Know your numbers. Hypertension is diagnosed when your systolic blood pressure is greater than 130 mmHg or your average diastolic blood pressure is greater than 80 mmHg. Visit ManageYourBP.org to better understand your numbers.

2. Monitor blood pressure. Once you learn your blood pressure numbers, take and keep regular records using an at-home blood pressure monitor. For an accurate reading, the CDC says to sit with your back supported for five minutes before starting and wait at least 30 minutes after drinking or eating a meal. You should also avoid stimulants for at least 30 minutes beforehand, as the CDC says that smoking and drinking alcohol or caffeine can elevate your blood pressure. If you take medication for hypertension, measure your blood pressure before your dose. Share your numbers with your health care provider.

3. Eat right. Reduce your intake of processed foods, especially those with added sodium and sugar. Eat less red meat and processed meats, and add more plant-based foods, such as vegetables, fruits, nuts, seeds and olive oil to your diet. Also, reduce your consumption of sugar-sweetened beverages and drink more water instead. Drinking sugary beverages, even 100 percent fruit juices, is associated with a higher all-cause mortality risk.

4. Drink alcohol only in moderation. If consuming alcohol, do so in moderation -- up to one drink per day for women and two drinks per day for men, and only by adults of legal drinking age.

5. Be more physically active. Do at least 150 minutes a week of moderate-intensity activity, or 75 minutes a week of vigorous-intensity activity. Be sure to include a mix of cardiovascular exercise, strength training and flexibility. Obtain guidance from your doctor if you aren’t sure if it is safe for you to exercise.

6. Maintain a healthy weight. If you are overweight, losing as little as 5 to 10 pounds may help lower your blood pressure. Consult your doctor about safe ways to maintain a healthy weight.

From the Fort Worth Fire Department

Register Today for the Sensory Friendly Touch a Truck Event

The Fort Worth Fire Department is teaming up with the Fort Worth Police Department, MedStar and CareFlite to provide a free, sensory friendly Touch a Truck event on Saturday, April 26.

This event will be held on the track at the Bob Bolen Public Safety Complex, located at 505 West Felix Street. There will be vehicles ranging from fire trucks, ambulances, police cars and helicopters along with robots from the Bomb & Arson unit and horses from the FWPD mounted unit, and more!

There will also be tables with representatives from various businesses and non-profits that provide resources to children on the Autism spectrum.

The event is free but a you registration is required. Participants may [register at this link](#), so that we have an accurate count of attendees. To ensure that this remains a safe, sensory-friendly event, the number of people must be limited.

There will be two sessions offered to allow for enough people to attend. When reserving your spot, be sure to pick either the morning session from 10 a.m. to noon, or the afternoon session from 1 to 3 p.m. We look forward to seeing you out there!

If you have any questions, please reach out at 817- 392-6812 and let us know.
